This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

Book Importing.

We would call the attention of Librarians and private buyers to our facilities for the importation of Books, Maps, Prints, Music, Autographs, etc. We have now, as our London Agent, a gentleman of large experience, both in this country and in England, who gives special attention to the collection of Old Rare Works, such Modern Works as are "out of print," Works on Special Subjects, etc. Orders are carefully and promptly filled at the lowest rates.

Foreign Magazines, Newspapers, Transactions of Societies, and all other periodical publications supplied with promptness and regularity.

Books, etc., for Public Institutions imported *free of duty.*

Letters of inquiry meet with prompt attention.

The Priced Catalogues of the Foreign second-hand Booksellers afford an excellent means of procuring books not usually found in stock in this country, at very reasonable prices. They embrace not only Old, Rare and Curious Books, but the best of Modern Works, desirable editions of Standard Authors, Finely-illustrated Works, etc., mostly purchased at the sales of private libraries, which are constantly taking place.

We receive these Catalogues regularly, and will take pleasure in sending copies to any of our customers who desire them, and import selections made from them. As, however, our orders can not reach the bookseller till about a month after the catalogue was issued, some of the books selected may be sold, as in most cases they have only single copies, but we usually obtain about three-fourths of all we order.
